

WORK EXPERIENCE

- **Intuit (via Magnit Global)** Bangalore/Pune, India | Feb 2026 - Present
Results-driven **Android Engineer** with **12 years** of experience building scalable mobile apps in **domains (Banking, Fintech, Media & Entertainment, B2B, B2C, HealthCare, Travel)**. Skilled in **Kotlin, Jetpack libraries, modular architecture, Agentic AI, and vibe coding**, with exposure to **Flutter, iOS, web, and desktop app development, Figma design**. Proven ability to drive product development from concept to launch in fast-paced, cross-functional environments. Passionate about clean code and impactful user experiences.
SDE - III Feb 2026 - Present
 - **Intuit Business Credit Card: Built Agentic AI workflow and skills** (Android dev, architecture, unit testing, code coverage) for Android app development. **Cut Jenkins pipeline time by 70%. Added voice command navigation to reduce user taps and improve UX. Architect and executed an end-to-end product development workflow, translating PRDs into functional HTML prototypes**, syncing designs with **Figma**, and delivering production-ready **iOS/Android features** from inception to Pull Request.
[Intuit Business Credit Card](#)
- **Globant** Pune, India | Dec 2017 - Feb 2026
Software Designer Dec 2023 - Feb 2026
 - **HSBC**: Created plugins and libraries for main application which scaled to countries like **UK, HK, SG**, etc. Contributed in revamping their main app with latest android technologies which affected **2 million users**. Led a team of 4 engineers in architecting and modularizing the libraries, achieving **90+% test coverage**. [HSBC](#)
 - **Optimizely SDK**: Engineered an Optimizely SDK leveraging plugin mechanism for **A/B Testing**. [Optimizely](#)*Senior Software Engineer* Oct 2021 - Dec 2023
 - **Goldman Sachs**: Led development of a security library using Thales SDK, implementing features like **root detection, code obfuscation, screenshot and overlay detection, and a custom secure keypad**; managed a team of 5 engineers. [Goldman Sachs](#)*Software Engineer* Dec 2017 - Oct 2021
 - **TravelNext**: Developed a corporate travel app using MVP architecture with cross-platform UI/UX, unit testing, code reviews, and **streamlined build sharing via Firebase App Distribution**.
 - **Data over Sound (POC)**: Developed POCs using Chirp SDK with **TOTP protocol**, later showcased for banking and entertainment use cases across multiple clients.
 - **Android TV Launcher (Jetpack Compose)**: Developed a **lightweight Android TV launcher** using **Kotlin, Jetpack Compose, MVVM, Coroutines, and Flow**. Implemented installed **app management, DPAD navigation, app launching, and package update detection, optimized for Android TV devices with 1GB–2GB RAM**.
 - **Roku TV App (POC)**: Implemented a Roku TV app as a prototype to **display list of videos and playing the video** after selection in **detail**
- **NeoSoft Technologies** Mumbai/Pune, India | Mar 2015 - Dec 2017
Sr. Software Engineer
 - **iCatchApp**: Independently developed and **published app on the Play Store**; integrated camera features and implemented client-driven enhancements.
 - **iMover**: Developed app with QuickBlox SDK for **video calls** and integrated video recording for item showcase and estimate generation. [iMover](#)
 - **HealthSaverz**: Developed key features for a healthcare app, including AlarmManager for **medicine reminders**, SEO optimization, prescription image upload, adherence score visualization, and API integration with partners (e.g., Dr. Batra, Metropolis); later acquired by **PharmEasy**. [HealthSaverz](#)
- **ShimBi Labs** Pune, India | Oct 2013 - Mar 2015
Jr. Software Engineer
 - **Resoftech/Pamac App**: Built a **Server-Driven UI** app to dynamically render banking forms and fields, with integrated APIs for data collection and submission. [PAMAC](#)
 - **Indus Steel**: Developed an app for product browsing, price viewing, and order placement, with additional features like order history, feedback submission, and direct contact with MD. [Indus Steel](#)
 - **MobiMike**: Built an app to **broadcast voice** from mobile devices through connected external speakers.
 - **AutoCop**: Implemented **OCR** to extract text/numbers from images, specifically recognizing Auto Rickshaw number plates, using **Tesseract, OpenCV**.

EDUCATION

- **Dhole Patil College of Engineering (Pune University)** Pune, India
Bachelor of Technology in Information Technology | Grade : Distinction 2010 – 2013

SKILLS

Languages: Java, Kotlin, BrightScript, SceneGraph, Dart, **SQLLibraries:** OkHttp, Retrofit, Compose, Dagger2, SQLite
Technology: Firebase, Maps, Payment Gateways **Others:** Android Studio, REST API, Git, Cybersecurity
